My name is Fadhil Ayudha, a graduate of Software and Game Development (PPLG) from SMK Wikrama Bogor in 2024. I am a hardworking, diligent, disciplined, detail-oriented, and dedicated individual qualities that I bring to everything I do. I am someone who can work in a team, and I have experience as a Front-End Developer at PT Arca International, responsible for developing responsive and attractive user interfaces (UI) for the company's ERP system.. I have an interest in a career as a Front-End web developer.

EXPERIENCE

Full-Stack Developer *October 2023 – January 2024*
SMK Wikrama Bogor – Bogor, West Java

- Creating an online library system for SMK Wikrama Bogor's library using Laravel and Bootstrap
- Designing UI/UX for the landing and admin pages using Figma
- Determining and creating the ERD table for the library
- Slicing Figma designs (landing page, history page, gallery page, e-book page, admin page, etc.)
- Implementing features to export book data to Excel and export book barcode to PDF
- Conducting application testing and finalizing (bug fixing, revisions)
- Creating Software Requirement Specifications (SRS) documentation

Front-End Developer – Internship *February 2023 – July 2023*
PT Arca International – Kelapa Gading, North Jakarta

- Joining the Developer team and assisting in developing the company's ERP system
- Learning new programming languages (CodeIgniter, Vue.js, JQuery, and Tailwind CSS)
- Adding purchasing and sales features to the Mitra ERP system
- Slicing Figma designs and making the website more dynamic and user-friendly using Vue.js and Tailwind CSS
- Restyling the company's ERP system website
- Testing the Exindo SRA and PROHUKUM system applications
- Creating documentation for the Exindo SRA system products

Front-End Developer *October 2022 – November 2022*
SMK Wikrama Bogor – Bogor, West Java

- Creating an automatic feeding system that uses Internet of Things (IoT) technology and can be controlled via an application using React.js, Express.js, and Tailwind CSS
- Designing UI and slicing Figma designs using Tailwind CSS
- Developing functions to consume APIs using fetch or axios
